

EXPERIENCE GEOTECH

Geotechnical Engineering Intern

Locations: San Ramon, Oakland, San Jose, Lathrop, Valencia, Irvine
Position Type: Full-time, paid

Summary

ENGEO 360° is a comprehensive summer internship designed for talented university students to explore the many facets of a professional technical consulting career in a dynamic, empowering environment.

We give our interns a perspective of geotechnical, geoenvironmental, hydrologic, and geologic engineering consulting. This internship will expose you to interrelated aspects of engineering, laboratory, and field experience. On-the-job training is provided in each of these aspects.

Internship Goals

- Provide a meaningful learning experience for talented students.
- Experience a leading engineering consulting firm.
- Make long-lasting connections with talented mentors and peers.
- Find out what makes ENGEO unique and make an impact on our business!

Our Ideal Candidate

- Excellent written and verbal communication skills.
- Can-do attitude with an eagerness to learn.
- Thrives in a fast-paced environment.

Required Qualifications

- Pursuing a degree (BS, BA, MS, or Ph.D. in Geotechnical/Civil/Environmental Engineering, Geology, or a related field.
- Must have taken an introduction to soils class.
- Must own or have access to a vehicle to visit job sites.

Internship Highlights

- Gain real-world consulting experience.
- Create long-lasting relationships with mentors and peers.
- Receive training in an ENGEO office, lab, and at project sites.
- Join ENGEO events (social/happy hours, picnics, hikes, BBQs, and more!)
